Preface

Census 2011 marks a milestone in the history of Census taking in the country, coming as it has at a time when India is at an inflexion point in history, when it sheds the legacy of the past and emerges among the comity of Nations as a strong, self-reliant and modern Nation. The basic benchmark statistics on the state of human resources, demography, culture and economic structure at this crucial juncture would be vital to guide and shape the future course of the Nation. In a country like India, with multi-ethnic, multi-lingual and a multi-cultural society, the Census is much more than a mere head count of the population. It gives a snapshot of not only the demographic but also the economic, social and cultural profile of the country at a particular point of time.

The Registrar General & Census Commissioner, India has released the highlights of the final population data of Census 2011 for the Country and States. In this volume, the highlights of the final population data of Census 2011 for Karnataka up to district level are presented. The data presented in this volume includes Population, Child Population, Literacy and Work status at the State and District level. The statements relating to work status are presented based on duration of work (main and marginal) as well as the broad category of work (Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers). In all, 48 statements, a handful of graphs and maps are included in this volume.

The Census operation is a testimony to the mutual cooperation and coordination that exists between the Central and State Government administrations. I take this opportunity to extend my sincere thanks to the Government of Karnataka for their unstinting cooperation and support in completing this gigantic task of national importance. I also thank all the officers/officials of the State Government, particularly the field enumerators and supervisors, for their hard work and commitment to this national task.
